

# HARWI 1250-2K

Radial arm saw

**BUILT TO LAST**

# HARWI 1250-2K

Radial arm saw

## BASIC-PREMIUM-PRO

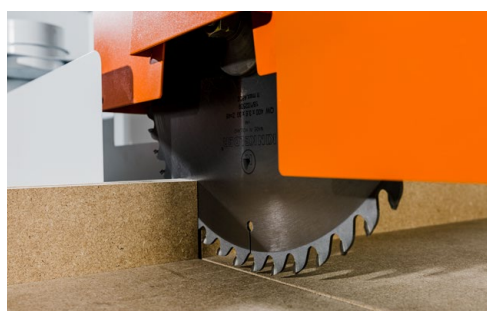

1250-H-2K

The **Harwi 1250-2K** model is an extension of our standard 625 line. The cutting length of 1250mm is perfectly suited for shortening a variety of wooden panels. The **efficient working method** and smooth sawing movement make sure that the operator is able to work **safely and ergonomically**. The 1250-2K is available in a **Basic, Premium & Pro** model. If you are looking for a **sawing solution** for sandwich panels with a steel top layer, we advise you to have a look at our **Harwi Multimatic machine** that has been **specifically developed** for this industry.

**"We recommend the Harwi Multimatic machine for sawing sandwich panels with a steel top layer"**

## Our mission

Through combining experience and craftsmanship with service and development, we strive for an optimal working environment in which safety, ergonomics and health come first.

The robust nature and the long service life of our machines characterize our passion for technology. Our core business is the delivery of standard sawing solutions in the wood industry. However we also use our expertise and knowledge to aid our customers in process specific sawing solutions.

## Our company

Harwi has been producing its sustainable sawing machines in Helmond in Brabant since 1960. Our specialization and expertise in the wood industry in particular has been ensuring satisfied customers for years.

Providing innovative sawing solutions within the Netherlands and abroad is the foundation of our organization. Within this foundation we prioritize user friendliness and quality.
